

# Layered Architecture of the DataPilot Platform

React 19, Vite 8, React Router 7, Zustand 5, Tailwind CSS 4, Recharts 3, Supabase JS client 2, serverless functions

*Tenant isolation: every row is confined to its bank by row-level security (the EY Admin (owner) sees all banks by design).*

*Solo in-progress answers stay in the browser; submissions, group assessments, profiles, and questionnaire copies persist in Postgres.*
