

Phase 1

Critical priority

Low band, dimension score below 2.0

- Approve a data strategy document at board level
- Appoint a CDO or equivalent with executive mandate
- Apply mandatory quality controls on regulatory reporting data

Phase 2

High priority

Mid band, dimension score below 3.0

- Automate key data quality controls in critical pipelines
- Document end-to-end lineage for regulatory reporting data
- Launch a self-service analytics capability with training

Phase 3

Moderate priority

High band, dimension score at or above 3.0

- Deploy real-time data quality dashboards for management
- Introduce advanced analytics and machine learning use cases
- Measure data culture adoption with an annual index
